

CONTRACT ADMINISTRATION / MANAGEMENT

- Engaged and motivated staff/team members increase efficiency & innovation
- Together “Sustainable change” can be achieved

The aim of a good contract administration system is to avoid disputes and achieve “value for money” management in accordance with the provisions of the contract.

Course content:

The effective management and administration of an organisations contracts is critical to the success of any business. It is the keystone to “Effective Cost Management” and deals with:

- Economic drivers of ALL parties to a contract—internal and external
- Relationship management
- Available support networks eg professional information and advice,
- The “value” of the issue under the contract (not always the “price”)
- Accountability and responsibility
- Legal liabilities of each party (not always aligned to internal structural liabilities)

By blending the concepts of sustainable management, effective negotiation, relationship management and effective processes and procedures, ATsolve’s team of industry experts, deliver a cost-effective practical course that will immediately benefit the projects. Courses can be tailored to meet specific organisational need and integrated with other associated training courses.
